

VICOSTONE 
The Art of Quartz

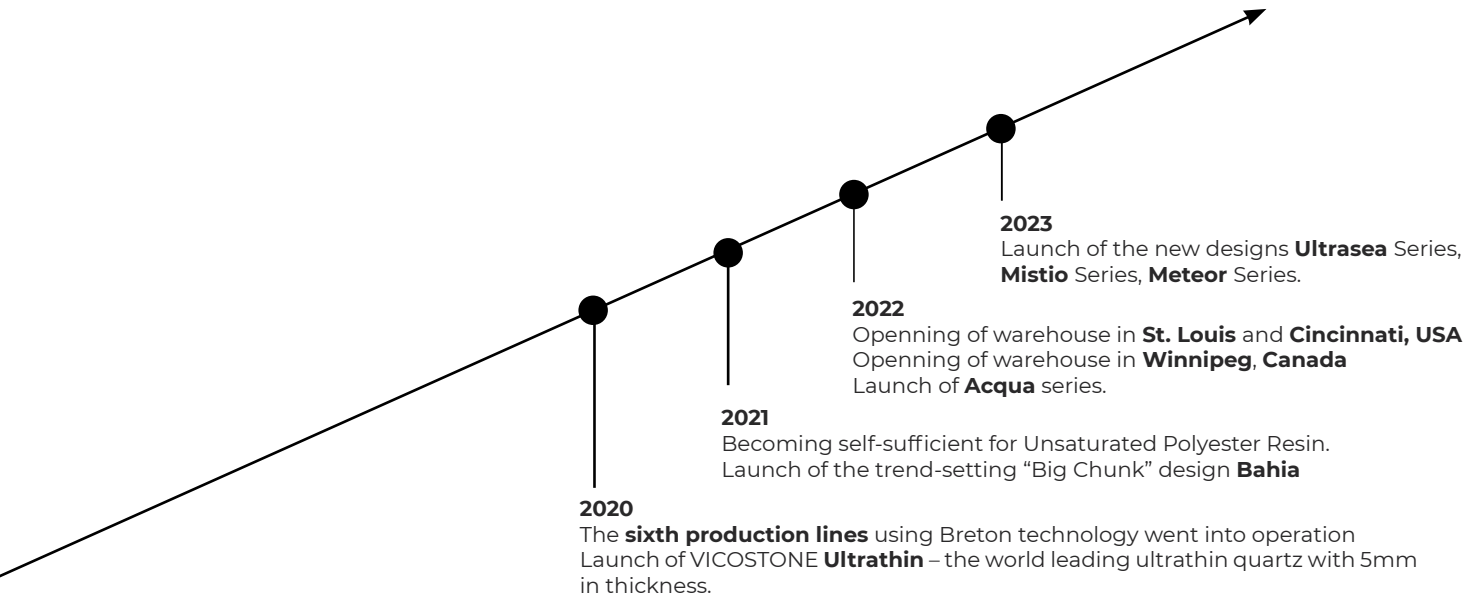

2023

COLLECTION

ABOUT US

Established in December 2002 at the Hoa Lac High-Tech Park, Thach That district, Hanoi, Vietnam, VICOSTONE is a **pioneer in manufacturing quartz-based engineered stones** in Asia. With a global distribution network, VICOSTONE Quartz Surfaces are now available on all continents and recommended by interior designers and architects.

SIX PRODUCTION LINES

VICOSTONE operates six slab production lines, using the most advanced techniques in the industry and the latest technology from Breton S.p.A. of Italy

TOP 3 GLOBAL

VICOSTONE has become one of the three largest engineered stone countertops worldwide manufacturers

DISTRIBUTION IN OVER 50 COUNTRIES

Thirty million square feet of VICOSTONE are made annually and sold in over 50 countries

20 YEARS OF DEVELOPMENT

VICOSTONE became a pioneer engineered quartz factory in Asia with more than 20 years of experience

R&D TECHNOLOGY

VICOSTONE emphasizes investing in R&D to discover new materials and differentiate its products to distinguish them from others.

INPUT MATERIALS

VICOSTONE has been self-sufficient, with more than 95% of input raw materials for the production of slab stone

SUSTAINABLE DEVELOPMENT

Emphasize improving production processes to satisfy higher environmental standards, maintaining a healthy environment for the localities and communities.

Creativity, Style and Natural Beauty

Vicostone quartz-based engineered stone is made from up to 93% pure natural quartz aggregates which are adhered with polymer resin and color powder. Its high percentage of quartz content gives Vicostone a hardness and flexural strength that is much higher than natural stones or non-Breton quartz products. The Vicostone collections feature modern styles and trends that leading architects and designers prefer and expect. Offering a rich color palette including neutrals, cool and warm tones, unique patterns, gemstone designs and nature-inspired looks, Vicostone is among the best quartz manufacturers in the world.

Sustainable

Vicostone products come with a Declare label, Health Product Declaration (HPD), Environmental Product Declaration (EPD), and contribute to LEED points for green building certification. The Vicostone factory and facilities preserve environmental balance by complying with and exceeding the strictest international and local standards.

Durable

Quartz is one of the earth's hardest natural minerals. Vicostone's high quartz content and advanced technology create an extremely durable stone that is resistant to scratches, heat, impact and corrosive chemical agents like acids or common cleaning solvents. Each Vicostone product is meticulously checked for quality and made to last.

Safe

Vicostone products come with critical health and safety certifications that contribute to the well-being of our communities. Vicostone is GREENGUARD certified free of volatile organic compounds and safe for the indoor air quality of buildings. It is GREENGUARD Gold certified safe for use in sensitive environments like schools and healthcare facilities. Vicostone is also certified safe for food preparation in commercial kitchens by NSF International.

Easy to clean

Vicostone is engineered for low maintenance. Nonporous and stain resistant, Vicostone quartz surfaces are simply wiped clean and never have to be sealed or polished. Vicostone is microbial resistant and easily disinfected with antibacterial soap and water.

The ideal choice for your interior applications.

BQ9500 - **Amarcord**

VICOSTONE QUARTZ SURFACES are regarded as a combination of timeless beauty and international-standard manufacturing quality.

With three exclusive collections, Exotic, Natural, and Classic, available in over 130 high-quality designs, VICOSTONE is a sustainable top-choice material representing luxury and delicate looks. The diverse color palettes are regularly updated with more creative and innovative concepts by our professional R&D team. Each collection consists of different series portraying the rare beauty of nature, such as calacatta or thunderstorm, and they have become one of our most famous products worldwide.

SKY SERIES

For thousand years, clouds have always been an endless inspiration for their admirers. People see them as the source for their exploration, appreciation and sublimation. It's sentimental seeing the clouds floating through airplane's windows. In them, we see purity, imagination, sometimes fierceness, and sometimes they look extremely mysterious on the dark blue sky on poles. All of their beauties are fully portraited in our Sky Series.

ULTRASEA SERIES

The Ultrasea Series comprises patterns with graceful and snappy veins that resemble corals and a background that mimics the characteristics of ocean floors. In addition to the new update with various types of veins, the most popular colors for interior design in the upcoming years, blue and green, are chosen to be featured in VICOSTONE products.

THUNDER SERIES

Lake Maracaibo in Venezuela is known as the “Paradise of Thunder Dances” with approximately 3 million lightning strikes per year. Famous photographers around the world gather here to hunt for these impressive moments. Fascinatingly, lightning at Lake Maracaibo is so bright that it can be seen clearly from a distance of up to 400 km away. Sailors can navigate in the dark in the middle of the vast sea by the power of these lightning strikes. We are inspired by this phenomenon and the power of mother nature.

Through quartz, we've infused the force of these bright, energetic lightning bolts, into the Thunder Collection
